

Lansdowne Chemicals Plc.

Lansdowne Chemicals are a dynamic and expanding company with operations in Oxfordshire, Rotterdam and Shanghai. Founded in the 1970's, Lansdowne Chemicals have established quality benchmarks in multiple markets and today are a respected supplier within a highly regulated market place.

“The regulatory compliance required simply to participate in these markets places a huge burden of responsibility on companies such as ours” said Mark McVeigh, Regulatory Affairs Manager. “When the need for pest control arose at our UK sites we required a company that understood the importance of compliance”.

As part of the process of engagement Prokill were required to carry out exhaustive risk assessments and to formulate detailed method statements to demonstrate their competence to work in such an environment.

Local Branch Principal Justin Holloway said “Prokill have invested heavily in building core competences that enable us to operate within the most challenging of environments. Hard won industry certifications and ISO9001 accreditation help us, like Lansdowne Chemicals, to set the benchmark in Pest Prevention. To be selected by Lansdowne Chemicals endorses our commitment to quality”.

Group Warehouse Manager Mr Tim Stockford added “throughout the engagement and implementation phase the Prokill team were attentive and delivered on their commitments without falter”
